Objectives and investment policy

Objectives
The objective of the fund is to generate high absolute return. The share class is accumulating.

Investment policy
The fund mainly invests in long and short positions in bonds and fixed income markets primarily in the Nordic, but also Euroland, UK and US. The fund aims to utilise imbalances in the markets by investing in both traditional government bonds and mortgage bonds as well as financial derivative instruments.
The fund aims to protect the investments by hedging the interest rate risk fully or partially, as well as by investing in a number of different strategies. The gross exposure is capped at 150 times the value of net assets.
The investment strategy is active. This means that there may be significant differences in the return relative to the alternative investment fund's target.
The fund is categorised as article 8 under SFDR and promotes environmental and/or social characteristics, as well as good governance practices, through screening, exclusions, investment analysis and decision-making as well as active ownership. The fund follows Danske Invest's responsible investment policy.

Latest fund report

In September, Danske Invest Hedge Fixed Income Strategies delivered a return of minus 1,48%, bringing the year-to-date return to 6.99%.

September, and particularly the last week of the month, was a very volatile period in global fixed income markets. 30-year yields in both US, UK and France edged higher to levels not seen in decades. Especially France came under pressure with yield spread to Germany widening to levels not seen since the Euro Debt Crisis in 2011 and 2012. While public debt levels have been increasing for years in the previously mentioned countries the higher yield levels is putting further pressure on deficit levels. That being said, the moves in September seem to have been fueled further by stops from hedge funds with positions in France. We expect elevated volatility to continue in the near term. The elevated volatility often implies attractive opportunities across fixed income markets.

Geopolitical uncertainty remains exceptionally high. In the Middle East, tensions escalated on 28 February 2026, when the United States launched strikes against Iran. The situation remains fragile, and Iran and the United States are still negotiating a permanent agreement.

The Russia-Ukraine war continues to draw significant attention amid ongoing attacks and limited progress in peace negotiations. Other areas of tension are also in focus, including the conflict in Gaza, strained relations between the United States and China over Taiwan, and political developments within the United States.

Looking ahead, we continue to see attractive opportunities. We expect not only to meet our return target of the risk-free rate plus 3-5% per annum, but to exceed it.

At the end of September, the portfolio?s risk level, measured as Value-at-Risk (1 week, 95%), was approximately 30% below our maximum risk limit. Overall, this indicates that risk has been more or less unchanged since the beginning of the month.

Please note that historical returns are not a reliable indicator of future returns. Additionally, monthly returns expressed in percentage terms are non-additive.

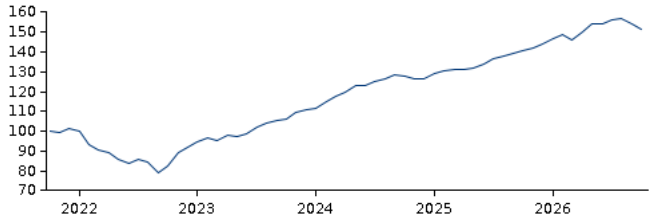
Performance fee: 20% of the share-class outperformance compared to the reference indicator, which is the High-water mark adjusted by Swedish krona Short Term Rate (SWESTR). The average of the last 5 years performance fee was 1.43%.

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products.

Return in the period: 29.10.2021 - 30.10.2026



The default for the chart is the return for the past 5 years as of end of month or, if the fund is less than 5 years old, since launch. Past performance is not a reliable indicator of future results. Future returns may be negative. The return may increase and decrease as a result of currency fluctuations if the fund is issued in a currency other than the currency used in the country in which you are domiciled.
