

Objectives and investment policy

Objectives

The objective of fund's investment activities is to achieve return on investment over the long-term through active asset management and to contribute positively to one or more UN Sustainable Development Goals while diversifying the assets in compliance with the Finnish Act on Common Funds and the Fund Regulations.

Investment policy

The fund's assets are invested mainly in publicly traded equities and equity-linked securities. At least two-thirds of net assets are invested in equities and equity-linked securities issued by companies that are domiciled, or do most of their business, in emerging markets defined as countries that are not recognised as developed countries by MSCI. The fund focuses on companies with economic activities aligned with UN Sustainable Development Goals, such as activities relating to renewable energy, financial inclusion, healthcare and innovation. The fund is categorised as article 9 under SFDR (Sustainable Finance Disclosure Regulations) and has a sustainable investment objective. In addition, the fund also promotes environmental and social characteristics. The fund follows Danske Invest's responsible investment policy. The returns on the fund's investments, such as dividends and interest, will be reinvested. The fund's base currency is the euro. It is generally expected that the fund's holdings, and therefore its performance, may differ significantly from those of the benchmark. The fund is suitable for investors who seek high returns and asset value increases, while also tolerating substantial value fluctuations or even decreases. The fund is suitable as part of a diversified investment portfolio. Investors may subscribe for and redeem fund units on every such banking day when the banks are open in Finland. Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 7 years.

Return in the period: 30.08.2019 - 30.08.2024

The default for the chart is the return for the past 5 years as of end of month or, if the fund is less than 5 years old, since launch. Past performance is not a reliable indicator of future results. Future returns may be negative. The return may increase and decrease as a result of currency fluctuations if the fund is issued in a currency other than the currency used in the country in which you are domiciled.
