

Objectives and investment policy

Objectives

The objective of this alternative investment fund is to achieve investment growth in any type of market conditions (absolute return). The share class is accumulating.

Investment policy

The fund seeks exposure to volatility risk premia embedded in equities, fixed income, credit, currencies and money market instruments from anywhere in the world with a focus on developed markets. The volatility-based strategies are implemented using derivatives such as options, futures and swaps. The fund may also, for a short period of time, invest directly, or via UCITS or UCIs, into such underlying securities. The fund will invest its remaining assets in UCITS (including UCITS ETFs), UCIs, high credit quality debt instruments, such as bonds issued by governments and credit institutions, money market instruments and/or short-term deposits. The fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes. Expected leverage is 800% to 1,000% with an expected maximum of 4,000%.

The fund is categorized under SFDR article 6. The fund follows Danske Invest's responsible investment policy.

The main part of the share class' NAV will be hedged against the base currency of the fund. However, the share class remains exposed to the currencies of the investments in the fund.

Recommendation: The fund may not be appropriate for investors who plan to redeem their money within 3 years.
