Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Danske Invest Allocation

Global Portfolio Solution DKK - Defensive Class TI (LU1806395197)

This fund is managed by Danske Invest Management A/S, a subsidiary of Danske Bank A/S.

Objectives and investment policy

Objectives
The objective of this fund is to achieve medium-term investment growth, while applying a defensive-to-balanced asset allocation strategy. The share class is accumulating.

Investment policy
The fund is a feeder fund, and invests at least 85% of its net assets in class X shares of a master fund, Danske Invest SICAV Global Portfolio Solution - Balanced.

The fund may use derivatives only for hedging, such as to hedge some or all of its holdings in the master fund, and the master fund's investments, into DKK.

The master fund gains exposure, directly or indirectly through other funds and derivatives, to a range of asset classes from anywhere in the world, such as equities, bonds and money market instruments. The fund may gain exposure to any credit quality, sector and country, including emerging markets. The fund aims to have a volatility level within an interval of 4% to 8%.

The fund is categorized under SFDR as article 8 and promotes environmental and/or social characteristics, as well as good governance practices, through screening, restrictions, investment analysis and decision-making as well as active ownership. The fund follows Danske Invest's responsible investment policy.

In actively managing the master fund's portfolio, the management team applies a flexible and dynamic asset allocation (including both strategic and tactical asset allocation) that seeks to take full advantage of market changes and opportunities. The master fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes. The master fund may invest in Chinese A-shares subject to quota and operational constraints, which may increase legal and counterparty risk.

The fund's performance does not fully match that of the master fund due to, in particular, the fund's costs and expenses, its potential use of derivatives and a difference in base currencies.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Benchmark
The fund has no benchmark.

Risk and reward profile

Lower risk						Higher risk
Typically lower return						Typically higher return
1	2	3	**4**	5	6	7

The fund is categorized as 4. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals lower risk. Please note that the fund's categorization is not constant and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are equity risk, interest rate risk, credit risk, leverage risk, derivative risk and exchange rate risk. As the fund will invest its assets in both the fixed income and equity markets, the changes in the market conditions and interest rates will affect the return of the fund.

For further details about risk, please refer to the following section in the fund's prospectus: "Risk Descriptions".

The cut-off time for orders to buy, switch and redeem shares for this fund is set before the cut-off time of the master fund to process these orders on the same day.

Charges

The charges you pay are used to cover the costs of running the fund, including marketing costs and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge 1)	3.00%
Exit charge 2)	1.00%
1) This is the maximum that might be taken out of your money before it is invested. 2) This is the maximum that might be taken out of your money before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.73% (including the master fund fees).
Charges taken from the fund under certain specific conditions	
Performance fee	0% (the fund is not charged a performance fee).

The ongoing charges are based on the previous year's expenses. The figure may vary from year to year.

The ongoing charges excludes performance related fees and transaction costs including brokerage fees and bank charges on securities transactions.

The entry and exit charges shown are maximum figures. In some cases you may pay less. For further details please consult your financial adviser or distributor.

In addition, a conversion fee may be charged in relation to conversions as described in the prospectus.

For more information about charges, please refer to the following section in the fund's prospectus: "Fund Fees and Costs".

Past performance

Launch date
2 April, 2019.

Calculation method
Below is shown the fund's and any benchmark's annual returns in percent including dividends if any. Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation. Past performance has been calculated in: DKK.

Disclaimer
Past performance is not a reliable indicator of future results.
